PROTEGO

A powder spray that soothes and protects minor wounds and skin irritations. It contains ingredients that have natural anti-bacterial, antiseptic and anti-fungal properties.

The addition of oregano oil gives the powder an aromatic component which helps repel flies.

Composition: Zinc oxide, calcium stearate, oregano oil, chamomile oil, arnica oil, tea tree oil, calendula oil

Classification: GSL
Size: 200ml

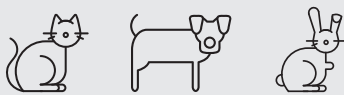

USES FOR LARGE ANIMALS:

- Any minor injury to the skin (bites, grazes, cuts)
- Udder rash
- Post dehorning
- Aids in reducing reliance on antibiotic sprays

USES FOR SMALL ANIMALS:

- Any minor injury to the skin (bites, grazes, cuts)
- Clipper rash
- Hot spots
- Interdigital irritation
- Fly strike

HOW TO USE:

1. Clean the affected area carefully.
2. Shake the bottle well until the powder sediment is thoroughly mixed by the steel ball inside of the container.
3. Spray on the affected area 2–3 times daily from a distance of 10 to 20 cm.

Being a spray, rather than a cream or ointment, Protego has the added benefit of no cross-contamination, and no need to wear gloves to apply.
